-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 16 July 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 6-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Rai et al. (6,337,692).

Regarding claims 6-9, Rai discloses a video input 31, which meets the claimed inputting step, and a saturation user interface 520 allowing the user to adjust the saturation of a selected hue (note Figures 5 and 6a), which meets the increasing step as claimed. Since the saturation is user adjustable, it can be adjusted to any value. The adjustment would have considered an intended use of the invention. In any event, the saturation qualification curve 518 as shown in Figure 5 is a function of the selected hue. It increases as it approaches the selected hue. Figure 6 shows that only the secondary colors are selected while the primary colors are not. By selecting the secondary colors, the corresponding color saturations can also be adjusted by the user.

Regarding claims 10-13, similar to rejections to claims 6-9, Rai shows a luminance qualification curve 524 allowing the user to adjust the brightness of the selected hue in a function of the selected hue, which meets the increasing step as claimed. Figure 6 shows that only the secondary colors are selected while the primary

colors are not. By selecting the secondary colors, the corresponding color luminance can also be adjusted the user.

Regarding claim 14, Rai discloses a video input 31, which meets the claimed inputting step, and a hue user interface 514 allowing the user to select any hue value, including the secondary color (note Figure 6a), which meets claimed shifting step (514).

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Holland et al. (5,412,433) shows a secondary color corrector.

Bachmann et al. (5,282,021) shows a hue, saturation, and luminance correction means.
